Fantasy Grounds - Map Pack: Lake Keep (2022)

Add-Ons If you use Dungeon Saga on all platforms (PC/Mac/Linux), please purchase the Add-Ons that are available separately from the online store here. Thank you. Downloads: FFTLAKE KEEP DEMOS This is the first of four map packs of themed Dungeon Saga rooms. Enjoy! When I think of a lake I think of sun, peace, and tranquility. A place to have a picnic, or go for a swim. Sailing on the lake, or fishing from the dock. A place to spend the day on the water with the children, or the family. This is a place where you would gather for a romantic evening, with candles, and soft music. This lake keeps a secret from everyone. An extra island, a 2nd floor, and a cellar. A Dungeon Saga themed tavern. This is the lake keep.A small keep situated on a lake or a river. The keep consists of 4 floors and a cellar, all fully furnished. All maps have a corresponding DM map.A bonus map is included with the hall tables fully set for a feast. In Total there are 12 maps.This Map Pack includes:This map pack also includes the 'Add-On' for Dungeon Saga: Lake Keep that contains all the rooms on the 2nd, 3rd, and 4th floors as well as the Cellar Room. This add-on is ideal for players that want to be the best Dungeon Masters in the land. The map pack also includes Hall tables that are all set for a feast.A small lake, or a small river. A place to go fishing. Swimming in the lake or through the river. Sailing on the lake or fishing from the dock. A place to spend a sunny day. This is a place that would be built to provide rest and relaxation. The lake keep is where the weekenders, or the quiet adventurers would go.For those, or for those who want to be the best Dungeon Masters in the land. This is a lake keep.A small keep situated on a lake or a river. The keep consists of 4 floors and a cellar, all fully furnished. All maps have a corresponding DM map.A bonus map is included with the hall tables fully set for a feast. In Total there are 12 maps.This Map Pack includes:2nd floor a 2nd floor b 2nd floor DM 3rd floor DM 3rd floor 4th floor DM 4th floor Cellar

What's new in Fantasy Grounds - Map Pack: Lake Keep:

sake Scenario Pack 3 (Screenshot) Fantasy Grounds' Lake Keepsake scenario pack, 3, is available for Windows, Mac and Linux. This scenario includes a 76 detailed map, many large detailed city layouts. Each of these area's not just unique to the scenario packs, but also to particular worlds with unique cities laid out on each native draft using Fantasy Grounds' native tile-supported "level editor". Scenario pack 3 includes 5 modules: Epic Feature #1: Outlanders/The Outlander, Epic Feature #2: Airship City-In-The-Sky Each of these modules has a variety of different content from monster to NPC to world features between them. Epic Feature #1: Outlanders/The Outlander includes an initiator, monsters, and lots of new player content for use in any campaign. Downloads This update has made significant work on the world editor as well, iterating hard and functional service as these scenarios are large. I find myself making function code to breathe life into the World Editor, having content implemented and play testing. Sometimes when I'm making content it feels like testing the guestimate of what the player would experience what I've made, or developing the content the world runs more efficiently. It's a great feeling! I haven't worked on it nearly as hard as I've worked on gameplay since Episode 1, but I still felt myself progress as a designer, and really enjoy seeing the game I'm making for in development. About this Release I'm going to take time to talking a little about putting these scenario packs out, and answering questions I see on forums or private messages about development. 1) MMORPG Libs, GG and Loading Screen Templates, World Editor Content In 2017 I made an engine purpose built to create large maps for MMORPG without the responsibility of maintaining a persistent data. Fantasy Grounds' data works just fine, but I didn't like the way it caches and I wanted to know what was going to be on the storage device I'd be using, and how that would fit within FFG's storage system. I found the MyBB ES (MBE Support) plugin. I used that plugin to create large tileable file which was as easy as making a file and deleting it. MyBB ES also presented the data in a convenient, very readable manner. With those files, I now reuse a lot of the large tileset components that Fantasy Grounds
